INTRODUCTION

The EEBE Business Forum is an annual initiative designed to connect the emerging talent of the Barcelona East School of Engineering (EEBE) with the business community. This event presents a unique opportunity to engage with future professionals in the technology and engineering sectors, within a setting that fosters exchange, collaboration, and the creation of new opportunities.

The 2026 edition will take place on May 6th and 7th on our campus and will offer various participation formats so that each company can choose the approach that best aligns with its goals. Whether through presentations, interactive activities, or informational booths, the Forum provides an ideal space to showcase your work, attract talent, and build connections with the university community.

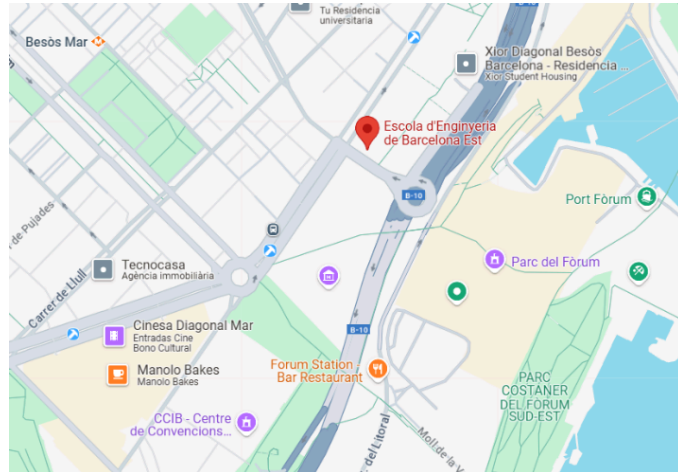

We warmly invite you to take part in this ninth edition and to join an event that, year after year, helps bring the academic and professional worlds closer together.

We sincerely appreciate your interest and commitment. Your participation is key to growing this space of exchange, learning, and opportunity.
